FUNERAL SERVICES

The difference between Coffins and Caskets

The most distinct difference between a coffin and a casket is the shape.

Coffins taper at the head and foot ends giving them the appearance of a diamond shape being wider at the shoulders. Lids are also fully removable.

Caskets are rectangular in shape and have a hinged lid.
Lining in the caskets are usually more ornate, adding to a more refined finish.

Timber and Hardwood Coffins

Our Timber and Hardwood Coffin Range is available in a variety of timbers and hardwood in stunning natural and gloss finishes from

- Mahogany
- American Red Alder
